Subject: RE: Status of Risk Analysis plan for NMP

Thanks for your e-mail. I will let the members that NMP is still under review and at this point, there is no known release date.

Hi Kathleen,

You are correct, there was an expectation to have the problem formulation documents out this April/May. However, the latest information I have is that they are still under review. I don't have a release date. And, I don't think we have a sense of how long will take to address all the internal review comments. I'm sorry, but at this point it is difficult for me to advise you with respect to your June meeting.

Please feel free to keep contacting me for an update, even if I only can tell you that we are still working on the documents,

Ana

Subject: Status of Risk Analysis plan for NMP

Good morning, Ana.

I hope this e-mail finds you well. I was wondering if there is an updated timeline for the release of the risk analysis plan for NMP. Based on an article that I saw awhile back, the NMP Producers Group expected the plan sometime in late April, but I am not aware that anything has been released yet. I just checked the EPA NMP risk evaluation webpage and didn't see anything new there either.

Please advise as to when you expect the plan might be released. I have a meeting with the group in early June, and we will want to do our best to plan ahead for this important step.

Thanks in advance.
